Project Design Phase-I

Solution Architecture
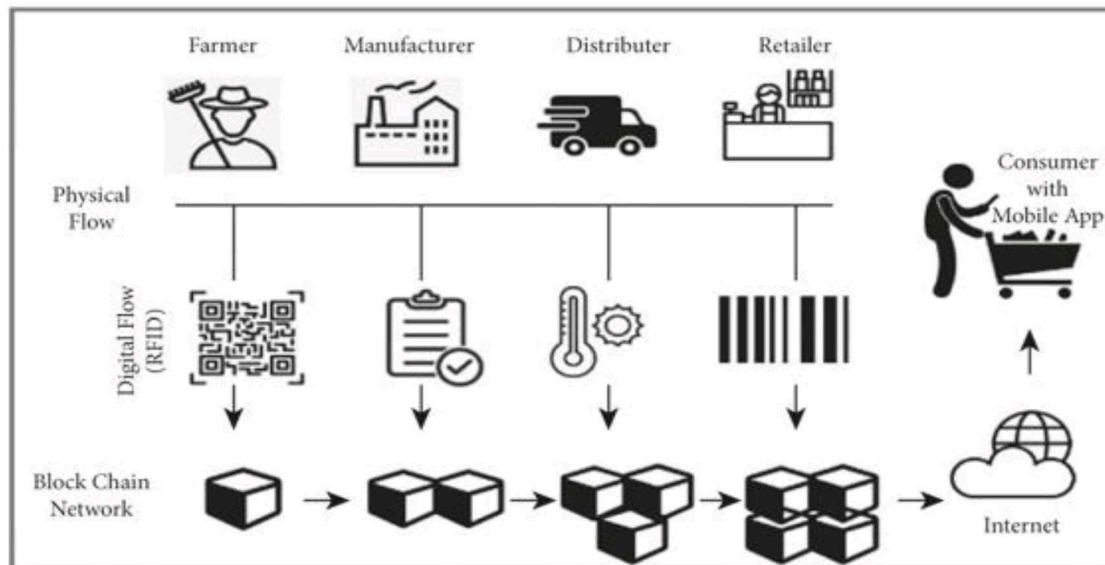

Date	30 October 2023
Team ID	NM2023TMID01749
Project Name	Agriculture Docs Chain
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridgesthe gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.

- Describethestructure,characteristics,behavior,andotheraspectsofthesoftw are to project stakeholders.

- Define features, development phases, and solution requirements.

- Provide specifications according to which the solution is defined, managed, and delivered.
